SEVEN P RANCH

27th Annual Spring Bull & Female Sale

Saturday February 20, 2021 • 1:00 PM

At the ranch, Tyler, TX

27th Annual Spring Bull Sale

Welcome to 7P Ranch's 27th Annual Spring Bull & Female Sale. Our ranch facilities have been developed to handle our bull sales on the ranch.

We are offering 40 select black and red, Simmental and SimAngus™ bulls. The majority of these bulls are bred up nicely from top Simmental, Angus and SimAngus™ A.I. sires and they have been developed on a high fiber ration. Again this year, we are also offering 40 select black and red, Simmental and SimAngus™ females. Included will be 10 open yearling heifers. Five heifers will be pure bred Simmental and five will be SimAngus™.

We will also offer a very nice set of 20 Simbrah females. Most of these Simbrah females will be eligible for Golden Certification from the American Brahman Breeders Association and registered with the American Simmental Association. We are also adding in a select group of 5 open yearling heifers eligible for Golden Certification and registered as well.

Viewing of the cattle will be Friday afternoon, February 19th and the morning of February 20th up to sale time. Our sale day BBQ lunch will be served at 12:00 noon and the sale will begin at 1:00 pm. Females will sell first.

Again, welcome to our ranch and sale. If you need further assistance in any way, please do not hesitate to contact us.

Sale Date and Time

Saturday, February 20 – Lunch at 12:00 pm – Females sell at 1:00 pm.

Sale Location

7P Ranch Headquarters, located 1.3 miles south of I-20 on FM 757,
midway between Tyler and Longview at exit 571B on I-20.

Accommodations in Tyler

Americas Best Value Inns, Intersection I-20 and Hwy 155. 903-877-9227 (5 miles from ranch) exit 567 Intersection I-20 and Hwy 69 (17.2 miles from ranch) exit 556. Days Inn 903-882-7800. Hampton Inn 903-882-1002. Best Western 903-882-8884.

Sale Day Phones

903-530-2371 – 903-235-9112

Sale Consultants

Warren Garrett 903-316-2889
Marty Ropp - Allied Genetic Resources 406-581-7835

Auctioneer

Mark Tillman 210-216-6754

Terms of Sale

Terms of sale are cash or check to be paid in full at the conclusion of the sale.
Sale terms and conditions enclosed.

Sale Conditions

Each animal will be sold to the highest bidder with the auctioneer settling any disputes as to bids. Each animal will become the property of the buyer as soon as sold. All persons attending the sale do so at their own risk. 7P Ranch, nor any person connected with the sale, assumes liability, legal or otherwise, for any accidents which may occur.

BUYER INFORMATION

HERD HEALTH
All cattle will sell with proper interstate health papers. All females were calfhood vaccinated. All sale cattle have been vaccinated with IBR, BVD, P13, Vibro Letpo 5, and eight-way black-leg. All bulls have been fertility checked and all heifers are reproduction tract examined. All sell guaranteed breeders. All eligible cattle will be brucellosis tested.

BULL CARE
Your yearling bull is a major investment. Experience has shown us that yearling bulls can function very well even under harsh environments. You can count on them to breed 20-25 females depending on the conditions. We have the following recommendations:
1. If possible, run your yearling bulls separate from older bulls during their first breeding season.
2. Make sure that your bulls gain weight in the fall after the breeding season before winter.
3. Feed energy supplementation (grain) beyond simply grass and protein to your yearling bulls. Avoid feeding the young bulls in the same pasture with older or horned bulls.

SIMMENTAL EPD EXPLANATIONS
Calving Ease Direct (CE-H) - predicts the average difference in ease with which a sire's calves will be born when bred to first-calf heifers. Expressed as percentage of unassisted births with a HIGHER value indicating greater calving ease.

Birth Weight (BW) - expressed in pounds and predicts the average difference that can be expected in an animal's offspring when compared with another animal in the same genetic evaluation. The LOWER the number the better here.

Weaning Weight (WW) - expressed in pounds and predicts the average difference in weight that can be expected between the progeny of animals in the same genetic evaluation of 205 days of age. The HIGHER the WW number, the more pounds weaned.

Yearling Weight (YW) - like Birth and Weaning Weight EPDs, Yearling Weight EPDs are expressed in pounds and predict the average differences that can be expected between progeny of animals at one year of age. Like weaning weight, the HIGHER the number, the more pounds at yearling time.

Maternal Calving Ease (MC) - predicts the average ease with which a sire's daughters will calve as first-calf heifers compared to the daughters of another sire in the same evaluation. Expressed as percentage of unassisted births. A HIGHER number here indicates a higher percentage of unassisted births.

Maternal Milk (MM) - expressed as pound of calf weaned by a bull's daughters. Reflects the average differences in weaning weight than can be expected in grandprogeny due to the milking ability of a bull's daughters.

Maternal Weaning Weight (MW) - this EPD value predicts the difference in average 205-day weight of a bull's daughters' calves compared to calves from daughters of all other bulls evaluated. The evaluation reflects both the maternal ability of the bull's daughters and the growth potential of their calves. When comparing maternal weaning weight EPDs of two sires, the larger maternal weaning weight EPD indicates heavier weaning weights due to the daughters' ability to produce heavier calves. Maternal Weaning Weight EPD is calculated by: MWW EPD = MMK EPD + 0.5 (WW EPD).

EPDS FOR CARCASS TRAITS
Explanations of the ultrasound measurements are as follows:

Marbling (MB)
The difference in marbling score expected in a bull's offspring compared to the offspring of other bulls in the population.

Yield Grade (YG)
The difference in yield grade expected in a bull's offspring compared to the offspring of other bulls in the population. Next sire summary YG EPD's will be used. These are figured by dividing the percent of retail cuts EPDs by -2.3.

Carcass Weight (CW)
The difference in carcass weight expected in a bull's offspring compared to the offspring of other bulls in the population.

All-Purpose Index (API)
Evaluates sires for use on the entire cow herd (bred to both Angus first-calf heifers and mature cows) with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put on feed and sold grade and yield.

Terminal Index (TI)
Evaluates sire for use on mature Angus cows with all offspring put on feed and sold grade and yield.

FINAL DATA WILL BE AVAILABLE ON SUPPLEMENT SHEET ON SALE DAY

~ NOTES ~

TEXAS TOUGH + BRAND BERMUDAGRASS

America's Number One Seeded Forage Bermudagrass!

903-597-6637 ★ 800-888-1371
www.easttexasseedcompany.com
seeds@easttexasseedcompany.com

East Texas Seed

- ★ Number one yielding seeded bermudagrass in production trials at TAMU Agrilife Extension & Research Center, Overton, TX and Mississippi State University.
- ★ Lower planting rate (10# per acre) due to being pure seed and not coated.
- ★ Economically priced to avoid the high cost and risk of sprigging hybrid-bermudagrass pastures and beefing up existing bermudagrass pastures.
- ★ 15% higher yield (four year average) than Coastal Bermudagrass.
- ★ Planted in twenty states surpassing 500,000 acres since 1994.
- ★ Hay show winner with quality at 22.5% digestible crude protein.
- ★ Virtually disease free, drought tolerant and easy to establish. Stands stay productive year after year.

Planting Date: 6/4/11 (Replanted 7/13/11)
10 lbs (P.L.S.) Planting Rate, LSD (0.05)
Commercially available varieties only included in these results.

I first planted Texas Tough + Bermudagrass for grazing and baling. I now have over 200 acres in production. It has remained free of disease and the yields have remained consistent. Texas Tough + establishes fast with excellent forage quality and fine stems. I am very pleased with my Texas Tough +, it has increased my grazing time from 90 days on native pasture to 150 days. Denny Chaney – Bertram, TX.

I planted 210 acres of Texas Tough + Bermuda, and started grazing in 45 days. It has been in our rotational grazing and has held up under our Florida conditions very well. We hope to plant more in the future when the right land is available. Dan Ryals, Ryals Citrus & Cattle Company – Fort Ogden, FL

SexedULTRA 4M™

THE BEST WAY TO PREDICT THE FUTURE IS TO *Create it*

- 90% gender accurate
- Conception rates rival conventional semen
- Fewer calving difficulties with heifer calves
- More ***profit*** from more replacements to sell
- STgenetics field reps offering A.I. Service
- Male-sorted semen offers more pounds and $$ at weaning
- View our sire lineup at ***STgen.com***

STgenetics®
